HELD IN “CLOSED SESSION”

MINUTES OF THE MEETING

On May 19th, 2021, at 2:00 p.m., the shareholders were convened by the Board of Directors in a Combined Ordinary and Extraordinary General Meeting (the “*General Meeting*”).

The preliminary notice was published in the BALO of April 14th, 2021.

The notice of meeting was published in the BALO of May 3rd, 2021, and in an online press service on May 3rd, 2021, on the website affiches-parisiennes.com.

The shareholders holding registered shares were convened by mail on May 3rd, 2021.

In accordance with the provisions of Article 4 of Order no. 2020-321 of March 25th, 2020 (amended and extended by Order No. 2020-1497 of December 2, 2020 and by Decree No. 2021-255 of March 9, 2021) adapting the rules for meetings and deliberations of the meetings and governing bodies of legal persons and entities without legal personality under private law due to COVID-19, the Board of Directors of the Company has decided to hold the General Meeting in closed virtual session without the physical presence of the shareholders and any other person authorized to attend.

Given the absence of the option for shareholders to attend the General Meeting in person, they were able to give a proxy to a named person, to the Chairman, or to vote by mail, using the form provided for this purpose and available on the company's website (www.dbv-technologies.com) since the twenty-first business day prior to this General Meeting, as well as electronically via the secure Votaccess platform.

These terms of participation and voting procedures were described in the notices of meeting and were the subject of a press release published on April 28th, 2021.

The General Meeting was chaired by Michel de Rosen, Chairman of the Board of Directors.

A live audio webcast of the General Meeting was made available on the Company's website. This broadcast, which lasted approximately one hour and included a power point presentation and an audio presentation, took place without interruption. The recording of the General Meeting will remain accessible on the Company's website for two years from the date of the General Meeting.

Acting on behalf of the Board of Directors, Daniel Tassé, the Chief Executive Officer, appointed Sébastien Robitaille, the Chief Financial Officer, and Michele Robertson, the Chief Legal Officer, as scrutineers, as required by law.

The Bureau of the General Meeting appointed Romain Letourneur, Secretary of the Board, as Secretary of the General Meeting.

The attendance sheet was verified, approved and certified as accurate by the Bureau, in particular on the basis of the data collected by the centralizing agent appointed by the Company.

On this basis, the Bureau noted that the shareholders, represented or having voted by correspondence, owned 28,094,905 shares out of the 54,887,887 shares forming the capital and having the right to vote.

The General Meeting representing more than a quarter of the capital was duly constituted and could therefore validly deliberate.

A presentation of the Company's activity and situation is then made:

- **By the Chairman of the Board, Michel de Rosen:**

« There is no doubt that the first half of 2020 has been a challenging time for DBV Technologies.

At the beginning of the year, in January 2020, the Biologics License Application (or BLA) for Viaskin Peanut, which we had submitted and filed in 2019, was under review by the U.S. Food and Drug Administration, also known as the FDA. On March 16, the FDA informed us that it was cancelling the Viaskin Peanut advisory committee and, during its review, identified questions regarding the impact of local adhesion of the patch on its effectiveness.

While DBV provided adherence data to the FDA to complete the Viaskin Peanut BLA, and the target date of August 5, 2020 remained unchanged, we then began to consider alternative scenarios for potential approval.

We evaluated all possible regulatory scenarios and each of them led to a significant delay in DBV's transformation from a clinical-stage biotech company to a revenue-generating commercial-stage company.

Daniel Tassé, your Chief Executive Officer, concluded that DBV would likely face significant financial pressure in the near term, with limited ability to raise the additional capital necessary for DBV to build its future and move forward.

In June, and after several meetings, Daniel Tassé and the Board of Directors made the very difficult and necessary decision to reduce the size of DBV and the scope of its operations in order to maximize the amount of time our cash flow could support our operations.

On June 26, 2020, DBV launched a comprehensive restructuring and cost reduction plan that included the discontinuation of several programs, the suspension of several activities, the transfer of certain functions to external business partners and a significant reduction in headcount.

Restructuring a company is always a difficult, complex and sometimes painful process.

However, DBV is emerging from this restructuring as a more streamlined organization, with greater financial flexibility, all of its critical functions retained, high-quality teams and a cash position that should enable it to fund its operations through the second half of 2022.

On August 3, 2020, DBV received what is known as a "Complete Response Letter" from the FDA (or "CRL") regarding the Viaskin Peanut patch BLA. In this letter, the FDA indicated that it could not approve Viaskin Peanut in its current form and identified several concerns, including, but not limited to, the impact of local adhesion of the patch on its efficacy.

Your company's management team, supported by a working group of internal and external experts, immediately began developing an action plan to address the FDA's concerns and clarify the clinical and regulatory approach to be taken in the United States for the Viaskin Peanut patch.

DBV submitted this plan to the FDA during the fourth quarter of 2020, and in January 2021, written responses received from the FDA clarified the regulatory path forward for the Viaskin Peanut patch in the United States.

So where do we stand, as of May 19, 2021? I am pleased to report that, while we are still far from the end of the journey, we are making significant progress in dialogue with the FDA to implement the clinical and regulatory development plan for the Viaskin Peanut patch.

I am also pleased to report that the review of the Viaskin Peanut patch Marketing Authorization Application (or "MAA") by the European Medicines Agency (or "EMA") is progressing according to DBV's expectations and is in line with the discussions that took place with the EMA prior to the submission of the dossier.

In the fourth quarter of 2020, DBV filed its MAA application, and the EMA has since confirmed that the application is sufficiently complete to begin its review. We expect to provide further information as the EMA review progresses.

All in all, ladies and gentlemen, we can look forward with hope. From the bottom of my heart, I hope that when we meet again in a year or so, your company will have made significant and tangible progress that you can be proud of.

A few words about the composition of your Board of Directors.

Your Board of Directors is proposing the appointment of two new directors for a period of three years:

- Adora Ndu, Group Vice President, Worldwide Research and Development at BioMarin; and,*
- Dr. Ravi Rao, Head of Research and Development and Chief Medical Officer at Sobi.*

The Board of your company also proposes that you approve the co-option of Timothy Morris, Chief Operating Officer and Chief Financial Officer of Humanigen, as a director of your company.

Your Board and I are confident that their recognized expertise will add significant value to our work.

I would also like to thank the outgoing members of the Board of Directors of DBV Technologies:

- Ms. Claire Giraut, who has been a member of the Company's Board of Directors since June 2016 and Chair of its Audit Committee since December 2016.*
- And Dr. Torbjorn Bjerke, who has been a member of DBV's Board of Directors since 2006. That's 15 years ago!*

We warmly thank Claire and Torbjorn for their professionalism, expertise and the commitment with which they have dedicated themselves to DBV. We will miss them.

Looking ahead to 2021 and beyond, rest assured that DBV is solidly positioned for the future. DBV remains steadfast in its commitment to seek approval for Viaskin Peanut in the United States and the European Union. The entire management team is motivated every day by its fundamental belief that children with food allergies, their families and the allergists who treat them, need and deserve multiple treatment options.

I would now like to invite my esteemed colleague, the CEO of DBV Technologies, Daniel Tassé, to provide a more specific update on the status and ambitions of your company. »

- **By the CEO, Daniel Tassé:**

« First, our thoughts are with the many families affected by the devastating effects of COVID-19. We know very well that people with food allergies have been hit hard, and have not been able to get their treatment optimally during the pandemic.

DBV supports children with food allergies and their families now more than ever. We remain committed to advancing our lead product, Viaskin Peanut, and look forward to potentially gaining approval and launching this new treatment option.

As our Chairman of the Board stated, DBV's setbacks in 2020 enabled us to emerge in 2021 with a sound strategy to advance Viaskin Peanut toward potential approval in both the U.S. and the European Union. We are encouraged by the clear and concise comments received from the FDA in January.

We are aligned with the Agency on the necessary steps to address the issues they raised in the August CRL. First, we will modify the patch with the aim of improving adhesion. We have already made significant progress on this front, and we have identified two lead modified patches based on a rigorous combination of in vitro data and the results of an adhesion study in healthy adult volunteers.

Second, we will conduct two clinical trials with one or two modified patches in the target patient population to generate data to support a potential BLA for a modified patch. We are calling the first trial EQUAL, and its goal is to demonstrate that mVP's occlusion chamber – the part of the patch that delivers the peanut protein to the immune cells of the skin - performs as well or better than cVP's. In order to achieve this, the FDA has asked that DBV assess that the antigen payload of the mVP is comparable or better than the antigen payload of cVP. This data will enable DBV to bridge the efficacy of the two products.

The second trial, which we are calling STAMP, will assess the safety and adhesion of the mVP in peanut allergic 4-11-year-olds. We will align with the FDA on the EQUAL and STAMP protocols and statistical analysis plans before we initiate the trial.

We are confident in Viaskin Peanut's safety profile. This additional safety study supports DBV's continued commitment to potentially offering a well-tolerated product for patients and families. I am pleased to say that this work is currently underway, and we expect to provide a comprehensive update to our shareholders and broader community once the protocols are completed. I am proud of the team and what we are accomplishing together. I am confident that these modifications will yield a product that will once again undergo FDA review in the near future.

We have also made significant progress on the potential approval of Viaskin Peanut in the European Union. In the fourth quarter of last year, the European Medicines Agency, or EMA, validated our marketing authorization application for Viaskin Peanut and began their review process. That review is progressing and in the first quarter we received the Day 120 questions from the EMA review team. The list of questions is consistent with what we were expecting to receive at that stage of the review cycle and are aligned to our pre-filing conversations with the EMA.

Of note, we did not receive any questions about the impact of adhesion on efficacy or a request for patch modification. The team is working hard to submit our responses to the EMA and the

next milestone will be the Day 180 questions. We will continue to update you on the EMA review progress as appropriate.

We have been speaking a lot about the regulatory challenges experienced in 2020. As Michel mentioned earlier, the uncertainties resulting from these regulatory setbacks led DBV to implement a massive restructuring plan that has changed the landscape of the Company.

It is never easy to see colleagues depart—especially when many have been with us for years. We restructured because we believe this was the right path forward for our company and the patients who will one day rely on our future innovative treatments. I am confident that DBV is now the appropriate size for a clinical-stage biotech. We worked hard to ensure that all key functions and expertise were retained during the restructuring. We are fortunate to have excellent talent on-board and have cultivated a sharp focus that will enable us to create value for shareholders, future patients, and their families.

I believe that we are now well-positioned to navigate Viaskin Peanut towards potential approval in the U.S. and EU.

From a commercial standpoint, we know that there is still very much an unmet need for peanut allergy treatment. The COVID-19 pandemic has presented many challenges for food allergy families and shaped the way they seek treatment.

We frequently hear that patients are now using teleconsultation. As a precaution, they are avoiding physical consultations. Families fear accidental exposure and having to seek emergency medical care during a pandemic. Plus, since the Covid-19 pandemic, treatments requiring multiple office visits and involving the risk of anaphylactic reaction are less attractive to families.

So, more than ever, families want options that reduce their children's risk of developing a reaction from accidental peanut exposure or ingestion. They want to live normal lives, lives without the fear of allergy.

We believe that Viaskin Peanut can be an important product for these peanut allergy patients, their families, and their allergists.

We also believe that Viaskin Peanut could support the lives of peanut allergy patients and their families, making it less difficult for them. That is why we are committed to potentially commercializing this innovative option.

The last thing I would like to mention before turning it over to Sebastien, is that DBV works hard to be good stewards of our existing capital. The money we have on-hand to execute our regulatory pathway is not our money — It is your money.

We will work carefully with our FDA and EMA partners to advance our lead product candidate.

With Viaskin Peanut, we are talking about immediate efforts, with a potential return in the short to medium term. But it is also important to continue to invest in earlier-stage development programs, because the future of DBV is even brighter when we think about how the Viaskin platform could benefit not only the lives of children living with peanut and other food allergies, but also those with other immunological disorders.

The nature of drug development takes time. DBV will always be transparent and communicate with our stakeholders when it is appropriate and when there is something noteworthy to share. Until then, rest assured that we are executing on our roadmap to bring forward promising and transformational products, including and especially Viaskin Peanut.

Now, I would like to invite DBV's Chief Financial Officer, Sebastien Robitaille, to share a few words with us. »

- **By the CFO, Sébastien Robitaille:**

« Before presenting the financial results for the year 2020, it should be noted that since January 1, 2021, DBV Technologies has been subject to the regulations of the US Securities and Exchange Commission (SEC) and other rules and regulations applicable to US domestic issuers, in addition to the French and European regulations already applicable to the Company.

Under SEC rules, the Company now prepares its consolidated financial statements in accordance with US GAAP. In addition, the Company continues to prepare consolidated financial statements in accordance with IFRS as adopted by the European Union, for publication in France and in the European Union.

As of January 1, 2021, the Company's financial statements filed with the SEC and the Autorité des Marchés Financiers (AMF) (including the Company's Universal Registration Document) are presented in U.S. dollars. Prior to this year, we qualified as a foreign private issuer and published our financial statements only in Euros and under IFRS.

The financial data I will now present is from the fiscal year 2020 consolidated financial statements in IFRS and in U.S. dollars

In 2020, operating revenues were \$11.3 million in 2020, a 23% decrease from last year. In 2020, as in 2019, operating revenue was primarily generated by the Research Tax Credit and revenue recognized by DBV under its collaboration agreement with Nestlé Health Science.

Operating expenses were \$168.9 million in 2020, a decrease of \$16.1 million from the prior year. Excluding restructuring costs, operating expenses for fiscal 2020 were \$145.9 million. The overall decrease in operating expenses, excluding restructuring costs, is primarily the result of budgetary discipline measures taken by DBV, in particular the decrease in personnel expenses, directly related to the decrease in average headcount in connection with the implementation of the global restructuring plan.

Because of the COVID-19 pandemic, DBV also experienced a decrease in certain expenses, including conference and travel costs.

Restructuring costs, related to the restructuring plan announced on June 26, 2020, were \$23.0 million for fiscal year 2020. These costs include personnel costs, legal and consulting fees related to the restructuring, and facility and asset fee impairment costs.

The restructuring plan, which includes significant headcount reductions (approximately 200 people), will result in a total workforce of approximately 90 people dedicated to continued innovation and scientific development of new therapies.

Net loss was \$159.4 million on December 31, 2020, compared to \$172.5 million at December 31, 2019.

Loss per share was \$2.95 on December 31, 2020.

Our cash position at the end of 2020 was \$196.4 million. Based on current assumptions, we expect our current cash position to support operations through the second half of 2022. »

This authorization cancels, up to the amount of the unused part, the authorization granted to the Board of Directors under the twenty-first ordinary resolution of the General Meeting of April 20, 2020.

The shares may be bought back in order to:

- support the secondary market for or the liquidity of DBV TECHNOLOGIES shares through a liquidity agreement with an investment service provider, in accordance with the standard practice accepted by the regulations, in which context, the number of shares taken into account for the calculation of the aforementioned limit corresponds to the number of shares purchased, after deduction of the number of shares resold;
- hold the purchased shares and ultimately return them for future exchange or as payment under external growth transactions;
- provide coverage to meet obligations arising from stock option plans and/or free share allocation plans (or similar plans) for the group's employees and/or corporate officers, as well as all share allocations arising under company or group employee savings plans (or similar plans), employee profit-sharing plans and/or any other form of share allocation arrangement for the group's employees and/or corporate officers;

- hedge the securities giving access to the company's shares, pursuant to current regulations;
- where applicable, cancel the shares acquired, subject to the authorization granted under the twenty-third extraordinary resolution of this General Meeting.

The acquisition, sale, exchange or transfer of these shares may be executed by any means, including through the purchase of share blocks, at the time deemed appropriate by the Board of Directors.

The Board may not, without the prior authorization of the Shareholders' Meeting, use this authorization during a public offer period initiated by a third party for the shares of the Company until the end of the offer period.

The company does not intend to use options or derivatives.

The maximum purchase price is set at €100 per share (excluding charges). In the event of a capital transaction, in particular a stock split or reverse split, or the allocation of free shares to shareholders, the abovementioned amount will be adjusted in the same proportions (multiplier coefficient equal to the ratio between the number of shares comprising the capital before the transaction and the number of shares after the transaction).

The maximum transaction amount is set at €150,000,000 (excluding charges).

The General Meeting hereby authorizes the Board of Directors to carry out these transactions, set the terms and methods thereof, finalize all agreements and complete all formalities when necessary.

Annex 1: Written questions

1. Does DBV expect to raise money in the near-term?

- The company will continue to be thoughtful about our allocation of resources and continue to evaluate our cash needs to advance Viaskin Peanut.
- As a biotechnology company in the pre-approval phase, we're always evaluating our cash needs and will continue to assess all financing tools available to us that support our corporate strategy.
- We cannot speculate on market reactions or future capital raises at this point.

2. What is the time horizon for the release of new patches for milk, eggs?

- Viaskin Milk has completed Phase II. The next step is the meet with the FDA to discuss a potential Phase III study.
- Our focus is on Viaskin Peanut now, and we have paused the milk and egg programs to give Peanut our full attention.
- We will provide an update on these programs in the future, as appropriate.

3. What are the other possible uses of the VIASKIN patch that DBV is considering?

- Our pipeline is built on the Viaskin technology platform, which harnesses the immune properties of the skin.
- We believe the Viaskin platform has the potential to generate product candidates for a broad range of immunological disorders in addition to food allergies.
- We have early-stage programs in autoimmune and inflammatory disorders, and vaccines.
- In our global restructuring plan and implementation, we retained the expertise needed to advance our pipeline.

4. In the Directors' report, DBV stated it had strengthened its production facilities in preparation for commercialization of Viaskin Peanut. Does that include both the modified patch and the current patch?

- Yes, our manufacturing process was engineered with Viaskin's long-term potential in mind and so it has the flexibility to produce multiple types of patches.
